

JOB SPECIFICATION: Junior Product Analyst

The Pulse Marketplace Product team is currently recruiting for a Junior Product Analyst to join our rapidly growing team.

This is initially a 6-month contract with the opportunity for it to become a permanent role. Our company is based in Dublin, however this is a remote role where you will be joining an amazing, friendly and supportive team located across Europe.

About Pulse Marketplace

Pulse Market is a platform that uses AI and intelligent technology to bring buyers and sellers together and transform the procurement process. We are a rapidly growing organisation with a team across Europe - from Edinburgh to Croatia. You will work remotely; however, you will have regular contact and support from your friendly colleagues. There will also be opportunities to travel to meet up in person too.

At Pulse Market you will be joining a team who embrace a challenge and are determined to push the boundaries. We love what we do and enjoy bringing others on our journey. We are excited by change and evolution. Our focus is on building a solution that makes our clients experience great and bring joy to our team too. Above all we strive to be better for good.

Job Purpose:

As a Product Analyst you will work in an agile software development environment researching market and user requirements. You will play a role in delivering our vision and product road map. You will achieve this by collaborating with the product management and engineering teams to create new and innovative features & functionality on Pulse Marketplace. Defining product requirements, assessing alternative approaches and recommending the optimum approach that best fits the end customer needs and desires.

This is a detail orientated role, with lots of room to apply and gain further knowledge within the product environment and across the organisation. You will work closely with product management to build and prioritise the product roadmap. Also work in a collaborative environment with distributed multi-discipline teams across diverse geographies.

Main Responsibilities:

- Market research and identifying the potential opportunities for product growth or improvement
- Collaborating with prospective users and clients to understand and anticipate their needs and use cases to translate them into product requirements
- Creation of user / customer journeys based on industry research and user observation to build unique and enjoyable customer experiences
- Identifying creation features and user stories. Also represent the customer viewpoint within the development process
- Liaising with product owner, developers and designers to communicate requirements

PULSE

- Creating, maintaining, and updating product information acting as an expert internally and externally.
- Helping with:
 - Writing up requirements and grooming the tickets
 - Product backlog maintenance and prioritization
 - Defining the product roadmap
 - Overseeing project timelines and splitting up the tasks
 - Defining the *definition of done* for scrum teams.
- Supporting the development team and finding the answers to questions they have
- Participating in:
 - Sprint reviews, providing feedback to the engineer team for product creation including design and development.
 - Daily scrum meetings, iteration planning and reviews
 - Overseeing all stages of product creation including design and development
- Partner with product manager(s) and clients to identify, document, and evaluate product requirements and contribute to future roadmaps.
- Present product demos to customers

Qualifications / Experience:

- Knowledge of the procurement process/financial services/technology and/or innovation sector is an advantage.
- Degree in computer science is an advantage.
- Keen interest in technology, comfortable engaging with technical teams.
- Experience of working within an agile methodology.
- Ability to prioritise with good organisational and analytical skills.
- Experience working with Microsoft 365
- Experience with Azure DevOps would be an advantage

Competencies Required:

- Self-starter with the ability to operate independently with minimal guidance.
- Excellent communication and collaborative skills.
- Demonstrate delivery of results, both at team and individual level.
- A structured analytical thinker with proven problem-solving abilities.
- Detail-oriented with the ability to bring clarity to complex situations.
- A high degree of initiative and flexibility.
- Customer orientated with focus on quality.
- Excellent verbal and written communication skills.

How to Apply:
